

Two-player Elite Delta 14B joystick support

If you have one Delta 14B joystick, plug it into the rear socket of the 14B/1 adaptor box and set the controls to "Delta 14B" for one player

If you have two Delta 14B joysticks, plug one into each socket of the 14B/1 adaptor box and set the controls to "Delta 14B" for both players

If you only choose "Delta 14B" for one player then the game will use the joystick in the rear socket

You can also use your Delta 14B as a normal joystick if you remove the 14B/1 and choose the "Joystick" option; in this case only the fire button will work
